Profile

I'm a Software Engineering graduate with a real passion for building useful and reliable web applications. I love solving problems through clean and efficient code and enjoy working with others to turn ideas into impactful solutions. I'm excited to keep learning, growing, and contributing to projects that make a difference.

Education

06/2021 – 06/2025

Bachelor Degree in Software Engineering

Adama, Ethiopia

Adama Science And Technology University

- Relevant Courses: Data Structures and Algorithms, Operating Systems, Relational Database, Web Application Development, Human computer Interaction, Mobile Appilicaation Development
- **CGPA:** 3.39/4.00

Professional Experience

06/2024 – 09/2024

Frontend Developer

Addis Ababa, Ethiopia

AGT+ Technologies

- Designed and developed responsive user interfaces for an **event management web application**
- Developed interactive UI components using **React.js**, **TailwindCSS**, **Figma** and **JavaScript**

06/2023 – 09/2023

Frontend Developer

Addis Ababa, Ethiopia

KurazTech

- Worked on developing a real estate renting web application for property listings and rental management
- Built responsive and user-friendly UI using **React.js**, **TailwindCSS**, and **JavaScript**

Projects

02/2025 – 05/2025

Organ Matching System

Full-Stack Developer

- Developed a full-stack organ donor-recipient matching system. Designed a custom matching algorithm based on organ type and compatibility. Backend was built with Node.js, Express.js, and MongoDB, while the frontend used React.js and Next.js. The system also includes authentication, email notifications, and ensures data encryption for privacy.

10/2024 – 01/2024

Travel Guide

Mobile App Developer

- Developed a mobile travel application enabling users to explore destinations, hotels, and attractions in one centralized platform.
- **Technologies Used:** Flutter, Firebase, Google Maps API

Skills

Python | Java | C++ | JavaScript | Nodejs | React | Nextjs | mySql | Flutter | Laravel | PHP
